

HAND IN HAND International, a non governmental organization with its headquarter office in Konstanz, Germany, is also represented with staff, school and centre in the Dormaa Municipality of the Brong Region of Ghana and has been a source of education to the down trodden and most unfortunate elements of the society.

All students currently enrolled are needy and poor children.

The organization caters for the welfare of this precious children in numerous ways.

As an early childhood educational facility, pupils are given quality tuition at the Kindergarten, fed once on a daily basis, given uniform and means of transport.

The organization also facilitates continuous support for the pupils who leave for primary school by financing feeding programmes, procuring uniforms and books as well as all their educational needs.

The welfare of every child is supreme to the core value of "HAND IN HAND International". In this direction, also the members of Dormaa - staff work tirelessly to see to the welfare of each pupil through regular visitation, advice, care and affection.

We also encourage every little improvement identified in the pupils as a way to unearth and sustain talents.

The organization is also at forefront of putting quality and affordable health care at the disposal of its pupils by registering them with the national health insurance scheme.

This loudable practice ensures that the pupils enjoy good health as they learn in clean environment for a better future.

The organization has had continuous support from expatriate social workers over the years many of whom come to the centre from Germany to teach and care for the children.

The immense benefit derived from their work can not be over - emphasized.

Academically, pupils from the Kindergarten section continue to excel at the primary level. Some pupils who had distinction at Dormass primary school in the 2008/2009 academic year have been listen below;

CLASS	NAME	POSTION
five	Regina Kumi	1st
Two	Portia Gyabea	1st
One	Edward Kumi	1st
One	Ernestina Gadago	1st

with excellent academic results, discipline and passionate social workers, the centre continues to find a better future for these less endowed children.

FUTURE PLANS

Being quite innovative and development - orientated, the HAND IN HAND Dormaa centre has various plans to foster the development needs. In the short term, the organization would like to embark on an excursion to Kintampo waterfalls to expose the children to nature and its beauty giving them life time experience of real pleasure.

Long termly, the centre also want to institute a football club based on the fact that this would also brightened the future of those who have talents in football and also provide an avenue for them to explore their talents for future benefits.

And if a dream could come true, the centre would also be pleased to have its own permanent place for its programmes to be run in future.

APPEAL FOR SPONSORS

Meanwhile the HAND IN HAND Dormaa centre is a lifetime to the less endowed and orphans of the Dormaa Community. Most of these are brilliant, talented and wonderful children but the world seems to have neglected them, leaving them perilously to the harsh conditions of this world.

However, with support from sponsors for these brilliant but needy children precious little lives would be turned, improved and refined. We therefore wish to appeal for new sponsors so as to reach out to many children who need immediate attention to change their world round.

APPRECIATION

In the name of the entire Dormaa team I wish to express our immense gratitude to HAND IN HAND International and the already existed sponsors who have made it to this far. May God richly bless them all.

Sheena Adofo, Teacher
Dormaa Ahenkro, Ghana, in October 2009
